Continuum Fortify For Endpoint Security
PRODUCT DETAILS

Continuum Fortify For Endpoint Security is an advanced endpoint security solution that addresses the needs of small medium businesses to combat cyber threats.

Is your small medium business client looking for threat protection, remediation, incident response, or managed detection and response?

We have the resources in our security operations center to power all of it. With Continuum Fortify For Endpoint Security, monitoring SMB environments, detecting malicious threats and quickly remediating every attack, all while reducing risk to your client's business. Continuum provides all that with a 24/7 global SOC service.

With coverage from multivariant ransomware attacks to the latest cryptomining infiltrations, advanced endpoint threat management from Continuum, coupled with SOC monitoring and remediation services stop active threats and minimize harm – and it's all backed by a $1m ransomware warranty.

TYNESO

ENGAGING WORKPLACES

"Continuum helped us develop a better security business than we could have built ourselves. Instead of having to assemble our own offering, everything we need is in the portal. That means Continuum partners can go to market tomorrow instead of six months from now."

Steve Tygat
Founder, Tyneso, Benelux

Key benefits

On-demand security operations
Cyber attackers target SMBs leveraging the same tactics as the big enterprise firms. Continuum provides a SOC that scales the protection with your business enabling you to focus on growing your business while Continuum provides the staff to drive remediation of threats.

Simple deployment, always available threat coverage
With a single agent, detect all known and unknown threats leveraging the latest behavioral based technology, regardless of where your endpoints are deployed (office, home, airport, café, hotel, etc.).

Next-gen threat detection and remediation
Continuum Fortify incorporates Endpoint Detection and Response (EDR) technology with patented threat identification and remediation technology. Quickly protect desktop and server environments for Windows, Mac and Linux operating systems as well as virtualized servers in AWS, VMWare, Citrix, VirtualBox, and Hyper-V environments.

Ransomware peace of mind
Confinue Fortify for Endpoint Security provides a $1M warranty to cover costs for Ransomware in the unlikelihood it is unable to protect or remediate. While it is not likely Ransomware will ever impact you when using Continuum Fortify for Endpoint Security, its nice to know you are covered.

Continuum Fortify For Endpoint Security

How we do it better

Delivering smarter, faster insights

Automated event correlation

Unified dashboards for all security tools

24x7 SOC service to reduce cost, maximize revenue

Immediate risk identification

Effective response, quick remediation

Ransomware rollback

Key features

MDR Provided Your Way
Implement advanced operations without the need for in-house security expertise. With Continuum Fortify for Endpoint Security, partners can deliver managed detection and response capabilities through the lens of the endpoint or via a unified dashboard built on BrightGauge. By analyzing quarantined applications and files, reducing false positives and ensuring comprehensive protection, Continuum takes care of the labor challenges while you focus on growing your business.

Threat Detection
Rapidly recognizes many thousands of virus and malware attack variants including cryptomining attacks as well as the root causes of these malicious behaviors by quickly identifying and diagnosing corrupt source processes and system settings.

Response and Remediation
When malicious behavior is detected, Continuum Fortify For Endpoint Security will quickly rollback files to previous safe versions through tracking changes in the devices and restoring it to an acceptable risk state.

Next-Generation Endpoint Security
Continuum Fortify For Endpoint Security provides unique malware detection and remediation technology. This solution incorporates innovative prevention technology, providing visibility into the root causes and origins of the threat, reversing the malicious operations of ransomware and remediating them at an agile speed, when needed.
