

Continuum Command For Mobile

PRODUCT DETAILS

Our professional and personal lives are blurred more than ever before with smartphones at the forefront of the crossover.

Protecting and managing all work sensitive information on employee mobile phones is a necessity and with Continuum Command for Mobile, MSPs are able to deliver a fast and simple way for their customers to configure and secure their employee devices.

“Continuum realizes that RMM is the backbone of the MSP business model. A fully-integrated solution frees us from day-to-day robotic duties and allows us to focus on operational and strategic planning and execution, as well as growing our business.”

James Ritter
CEO & Founder, Pulse
Technology Solutions LLC
